

DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 06 September 2021 at 09:27 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to increase and become Moderate for many across central and southern England and Wales. Largely Low elsewhere.

Tomorrow: Areas of Moderate air pollution becoming more widespread in England and Wales on Tuesday. Pockets of High pollution cannot be ruled out, especially in eastern areas. Remaining largely Low elsewhere.

Outlook: Air pollution levels remaining largely Moderate in eastern parts on Wednesday. A general improvement is forecast thereafter, with Moderate levels becoming largely confined to Scotland. This is due to a change in the weather, with the return of wet and breezy conditions.
